

WHALES

9798765400333

Did you know?

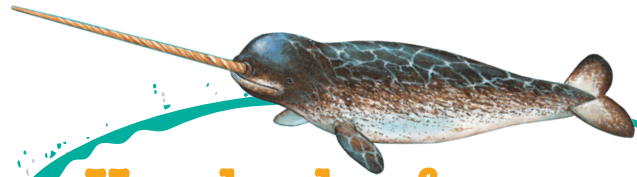

Belugas

were the first whales to be kept in captivity. Like many whales, belugas are quite intelligent and allow humans to interact with them.

Hundreds of years ago,

traders charged top dollar for narwhal tusks by claiming they were actually unicorn horns with magical powers.

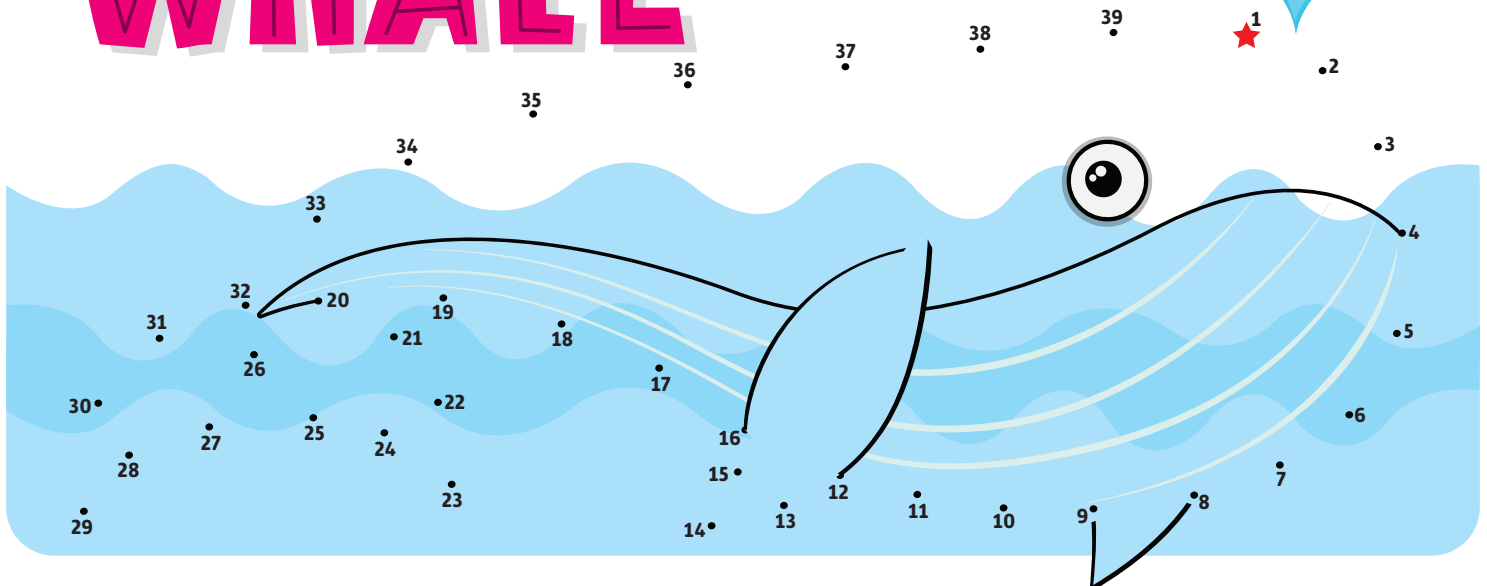

Orcas

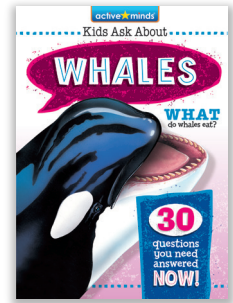

are the only natural predator of great white sharks. That is why the boat in the movie *JAWS* is named Orca!
